

What exactly does your organization do?

YY ReGen focuses on providing sustainable solar energy solutions for agriculture, particularly in remote areas. We offer solar-powered ReGen-R8 units to farmers and cooperatives, helping them reduce energy costs and environmental impact while improving productivity. Additionally, we engage in sustainable organic farming and have developed a line of agricultural products.

In which country/countries is your organization active?

YY ReGen is currently active in Lebanon, where we operate and rent out our ReGen-R8 solar units to farmers in remote areas. We're also planning to expand to the Gulf region soon.

How did you hear about DEPAR?

We were exhibiting with ESCWA at the ARAB SMEs Summit 2024 in Qatar.

What would you like to gain from the DEPAR community?

We are excited to connect with like-minded organizations and professionals in the DEPAR community to share knowledge, foster potential partnerships, and explore new opportunities for growth and sustainability in the energy and agriculture sectors.

What else would you like to tell us?

YY ReGen is committed to creating innovative and sustainable solutions that not only help farmers but also contribute to a greener future for all. We're also continuously working on projects such as agrivoltaics and sustainable organic farming to ensure long-term positive impact.
